GULF STATES UTILITIES COMPANY

JULY, 1966

Drivers: Buckle Up! Jury Says

A CASE RECENTLY tried in the 85th District Court of Texas involved an October traffic accident where two drivers, traveling in opposite directions on the thoroughfare, were involved in a near head-on collision. One was wearing seat belts, the other was not. The first was not injured, the other received head lacerations, resulting in several scars. He sued on the basis of the scars, asking \$14,000 personal damages.

It would have been just an ordinary suit, the judge stated, but the new question of negligence, in the failure to use seat belts, came up. The jury found against the plaintiff. They found he was traveling too fast, not looking where he was going and not wearing his seat belts. The jury decided that his failure to use the harness was a failure to exercise sufficient care to prevent injury to himself. It said that 95 per cent of his injuries could have been prevented, had he been wearing the belt.

This, and other similar cases, will definitely have a far-reaching effect on laws and insurance connected with auto safety. It now behooves the motorist to pay more attention to his seat belts. It might be to his advantage financially as well as physically. There is a possibility, for instance, that insurance companies might develop requirements that persons wear seat belts before the companies would pay off their claims. Also, failure to use seat belts might become a part of the determination of insurance rates.

Psst, Lyndon! Here's a Dollar Leak

DOES MR. JOHNSON really care about dollar exchange, or does he talk out of both corners of his mouth? Here are excerpts from the June 18 issue of 'Chicago Tribune' titled as above:

'President Johnson and Secretary of Commerce Connor have been so busy lamenting the dollars spent abroad by private industry, despite their pleas for restraint, that they seem not to have noticed what the Tennessee Valley Authority is doing right under their noses. For example, the world's largest bank of electrical transformers arrived recently at New Orleans from Sweden, for the TVA power station at Widow's Creek, Alabama, where it will help the TVA distribute power far beyond its present range. Transformers have been arriving at New Orleans from Austria, at the rate of about one a month, also destined for the TVA. Still another TVA order worth more than 2 million dollars was recently placed in England. And lest anyone think that only transformers made in socialist countries will work in a socialist power system, TVA has awarded other recent contracts to companies in France and Japan.'

OUR COVER

ATOMS AND YOUTH again proved a stimulating experience as our Company joined Texas' other nine investor-owned utilities and the University of Texas to stage the sixth edition of the Texas Nuclear Science Symposium June 12-15 at Austin. Some 300 of Texas' brightest high school science students and their teachers heard the latest in the world of the atom from an impressive roster of research scientists. Our Company sponsored 22 students and 17 teachers from our Beaumont, Port Arthur and Navasota divisions. Shown on a tour of the Plasma Dynamics Research Laboratory are three of our delegation, Cecile Bythewood of Beaumont French, Charlie Beckett, Jr., of Anahuac and Phillip Bagwell of Beaumont Forest Park. Dr. Arwin Dougal, left, and Dr. W. C. Duesterhoeft, second from right, both professors of electrical engineering at the University of Texas, explain the controlled fusion research they are performing under the sponsorship of the Texas Atomic Energy Research Foundation, made up of Gulf States and nine other investor-owned utilities.

national Council of Indus-
trial Editors.

News Briefs

JULY, 1966

Vol. 1 No. 2

HEAT WAVE HIKES KILOWATTHOUR USE

As we go to press, July's thermometer-busting heat wave continues across most of the nation, including GSU-land. Demand for electricity is setting new records almost daily. Our Company set two peak load records within the past 10 days, the latest occurring July 19, when the load reached 2,049,000 kilowatts. System generating capacity is 2,095,000 kilowatts. In addition, we are absorbing up to 25,000 kilowatts a day from the Sam Rayburn Dam which began operating this month. Through our interties with the TVA we have available another 135,000 kilowatts. So, even when the heat's on, the power is on tap.

"GO SALES ROUTE 66" KEEPS "SALE-ING" ALONG

Latest residential Loadbuilders Report speaks well of the sales program for 1966. At year's half-way mark, the report shows percent of system quotas achieved as follows: heating 94 percent, gold medallion homes 78 percent, ranges and bronze homes 55 percent, water heaters 52 percent, dryers 49 percent and heat pumps 39 percent.

Commercial sales are ahead of quotas, too, with air conditioning at 65.2 percent, resistance heating at 60.3 percent, cooking at 59.5 percent, lighting at 54.9 percent and heat pumps at 51.1 percent. So far, 46 all-electric buildings have been added to our lines. Industrial sales, too, are on target.

Looks like the theme "Go Sales Route 66" rings true.

FEDERAL ELECTRIC BANK SIDETRACKED...PERMANENTLY, WE HOPE.

On July 21 the House Agriculture Committee sidetracked two bills which would have established a Federal Electric Bank to make low-interest, long term loans to rural electric co-operatives. The Committee left a way open for the proponents of the bank to return next month with a compromised version. There is cause for optimism, but certainly not complacency, on our part.

COURTESY COUNTS

These days if a customer's service is interrupted, he is understandably impatient to get it back on in a hurry. Electricity has become so much an American way of life that a 3-minute interruption stretches into a half hour "blackout" by the following day's coffee break. This is especially true during these hot days and nights. So if customers call in to report an outage, let's be even more courteous than usual in our explanation. When subdivisions blossom out with air conditioning units, it's not uncommon that load problems will develop and our facilities will need strengthening. So welcome the customer's report and thank him for calling.

CONSTRUCTION UNDERWAY FOR NEW SILSBEE OFFICE

Silsbee Gulf Staters will begin serving our Silsbee District customers from new offices around the end of the year.

Construction work began recently on a two-story office building at the corner of North Sixth Street and Avenue H and our Company has leased the downstairs area for use as a new Silsbee District office.

The masonry structure will be 90 by 70 feet with a large parking area at the rear.

GREATEST INCREASE IN RESIDENTIAL KILOWATTHOUR CONSUMPTION REPORTED BY COMPANY IN EEI REPORTING GROUP

"A good showing" was earned from Chairman Richard when our Company turned in the highest increase in average kilowatthour usage per residential customer among the 16 West South Central electric companies reporting to the Sales Division of the Edison Electric Institute during the 12-month period ending May, 1966.

Our Company showed an increase of 442 kilowatthours over the previous 12-month period. We surpassed our neighboring utility, Houston Lighting & Power Co. by 51 Kwh and our Company was third among the 16 companies in average usage---6,092 Kwh. Leading the group was HL&P with 7,366 Kwh and Dallas Power & Light Co. with 6,824 Kwh.

Our Company's increase also tied us in eighth place with Green Mountian Power Corp. of the New England group among the 133 companies from throughout the United States reporting residential sales to EEI at the end of May.

HUNTSVILLE STATE PARK MOVES INTO THE LEAD IN THE NUMBER OF VISITORS

It looks as if tourists are becoming aware of the fine recreational facilities in our service area. Huntsville State Park at Huntsville, Texas, has taken the lead over Garner State Park near Uvalde among Texas' state parks in the number of visitors according to "Scot Wildlife News" published in Dallas. Last year Huntsville State Park hosted 1,568,152 visitors and far exceeded the number which visited Garner Park.

On Memorial Day weekend alone, the unofficial attendance was more than 50,000 persons. The 30 available screened shelters are already reserved through Labor Day.

Tourism is fast becoming Texas and Louisiana's leading industry and with the development of area waterways and the growth of recreational facilities we can expect our service area to get a good share of this industry.

ANNOUNCES NEW UNIT. Chairman Richard makes the official announcement that our Company will install a 580,000 kilowatt turbo-generator at Roy S. Nelson Station at a luncheon for the mayors and city officials of Lake Charles, Sulphur and Westlake, Louisiana, on July 6. The new No. 4 unit will push Nelson Station's capacity to nearly one million kilowatts. Construction is scheduled to get underway by June, 1967, and will take a 30-month construction period.

Lake Charles Area's Economic Outlook Prompts Location Of 580,000 Kilowatt Unit at Nelson

CHAIRMAN RICHARD painted a rosy economic picture of the Lake Charles, Sulphur and Westlake area and announced our plans for staying ahead of electrical demands at a luncheon meeting July 6 at which our Company hosted mayors and city officials.

"We are so confident of the economic well-being of this Gulf Coast area that we are going to spend \$42 million to expand our Roy S. Nelson Station at Westlake," Mr. Richard told the 18 "city dads".

It marked the official announcement of our plans to install a 580,000 kilowatt turbo-generator at Nelson Station, whose present capacity is 384,000 kilowatts. Mr. Richard told the group that on-site construction will start in June, 1967, and the target date for completion is November 1, 1969.

"Addition of Nelson Station's No. 4 unit—plus similar expansions already under way at two other Gulf States plants—will increase GSU's net generating capability from its present

2,095,000 kilowatts to 3,695,000 kilowatts by late 1969," Mr. Richard revealed. "It's an increase of over 70 per cent."

Southwest Power Pool Generating Capacity to Reach New Record

THE SOUTHWEST POWER POOL, made up of interconnected electric companies including our Company from this area, has just completed a survey that shows a record total of generating capacity under construction or planned between now and December, 1970.

The survey revealed that the installation of 6,636,000 kilowatts is planned by pool members over the next 4½ years. Only 14 nations of the world had more capacity in 1964 than the Southwest Power Pool companies are installing between now and 1970.

The pool is made up of 15 investor-owned utilities in Texas, Louisiana,

He told the city officials that addition of the new unit will prompt 20 more permanent jobs upon completion and upwards of 400 jobs during the peak of the 30-month construction period. All but about 35 of the construction jobs will be filled through Lake Charles area union halls.

Stone and Webster Engineering Corporation of Boston, Massachusetts, will design and construct the new No. 4 unit at Nelson Station. The turbine generator will come from General Electric's New York plant and the steam generating unit will come from Babcock and Wilcox Company's Ohio plant. Westinghouse Corporation will supply the surface condensers and feedwater heaters from its Philadelphia plant.

Mr. Richard reminded the city officials that Nelson Station is one of our Company's most modern installations, going into commercial operation in 1959 with two units and a net capability of 222,000 kilowatts. A third unit was added in 1960 to boost the station's capability to its present 384,000 kilowatts.

Jim Sudduth, mayor of Lake Charles, served as spokesman for the three municipal governments and said the expansion "is indeed welcome news for everyone in this area."

Arkansas, Oklahoma, Kansas, Missouri and Mississippi.

The survey shows that individual generators under construction or on order range from 15,000-kilowatt gas turbines to 580,000-kilowatt steam units.

Included among these units are three new units of our Company—the 440,000-kilowatt unit now being installed at Sabine Power Station near Bridge City, the 580,000-kilowatt unit on which construction began last month at Willow Glen Power Station near Baton Rouge and the new 580,000-kilowatt unit that was announced earlier this month to be added to Roy S. Nelson Power Station near Lake Charles.

OBLIGATION TO CUSTOMERS. Carl Beaumont, general line foreman, Port Arthur Division, points out that our Company has a responsibility for service to our public and that we could not have grown without recognizing that we have an obligation to our customers.

OUR RESPONSIBILITY. Floyd J. Gonzales, service foreman, Baton Rouge Division, states that it is our responsibility to be conscious of our obligation to our public whenever trouble hits. We must go in high gear until service has been restored.

Good Service, The Challenging Responsibility Of Every Gulf Stater

RESPONSIBILITY, ACCORDING to Webster, is the condition of being obligated to account for something.

And be it large or small, nearly everyone should-ers responsibility of a sort.

With our Company, for example, the word has monumental connotations what with over a third of a million customers depending upon Gulf States for commodities so often taken for granted—electricity and gas. It's that way because it's there when needed. Just flip a switch or turn a knob and it's available 24 hours a day.

The Baton Rouge Sunday Advocate hit the nail on the head in an editorial that brought our Company's responsibility for continuous service into sharp focus.

"These days many of us here in Louisiana live in fear of disaster that grandfather could not have imagined. It is a disaster that could bring great suffering and hardship on us and force us to flee our homes or our offices and seek refuge with friends or relatives, in hotels or motels, or in other buildings. The disaster, of course, is a breakdown in the air conditioning unit."

It went on to say that we live today surrounded by machinery—air conditioners, refrigerators and other devices which run all the time.

"When a breakdown occurs, the sudden silence is as unnerving as the inexorable rise in temperatures," concluded the Sunday Advocate editorial writer.

A bonafide challenge has been dropped at our feet. Our task, or responsibility, is clear. We must show our public that we deserve the responsibility. Only we, the employees, can do it by providing continuous service and restoring service in the quickest possible time when interruptions occur. Nothing short of dedication to the task will do.

A WAY OF LIFE. E. L. Priest, assistant general line foreman, Beaumont Division, believes that Gulf Staters should never lose sight of the seriousness of our responsibility to our customers . . . a constant supply of electricity. "Responsibility is more than a day's work. It's a way of life," he says.

It's an old but still challenging story among our Company's operating personnel. They live with it 24 hours daily which makes it a way of life for them, all the way down to the youngest Line or Gas Department helper.

"You might compare our service with a railroad serving a distant and isolated town," observed E. L. Priest, assistant general line foreman, Beaumont Division. "If something should happen, the town's whole pattern of life would come to a standstill. Disrupted electric service can affect not only the routine way of life for a community or city but also the entire economy if interruptions are prolonged. The finest homes and offices that can be built revert to primitive stages when electricity goes off.

"We never lose sight of the seriousness of this sort of thing whether we're at work or at home. Our whole organization is geared to maintaining a constant supply of electricity and restoring it as quickly as humanly possible when trouble occurs. To me, responsibility is more than a day's work . . . it's a way of life for Gulf Staters."

Floyd J. Gonzales, service foreman, Baton Rouge Division, seconds Mr. Priest.

"I feel we have an obligation to our public and, like other Gulf Staters, I'm conscious of it wherever I might be at whatever time trouble hits," Mr. Gonzales said. "Regardless of the trouble—be it a small distribution line or a major high line—we

go into high gear until service has been restored to our customers. It's our responsibility."

Carl Beaumont, general line foreman, Port Arthur Division, points to our complex but finely organized disaster and trouble plans as evidence of how seriously our Company feels about a responsibility to its public.

"When a trouble call comes in, we go into action quickly and like clockwork," Mr. Beaumont said. "It's taken a lot of time, research and training but today there's nothing left to chance from a feeder outage all the way up to a major disaster. We've come this far because management and employees alike recognize an obligation to our customers."

Ernest Kelly, utility foreman, Denham Springs, knows that responsibility is no less in our smaller towns and communities.

"People everywhere depend upon electricity more and more every day," Mr. Kelly said, "and they don't realize its value completely until service is lost. Most of the time I don't even wait for a call when the lights go off at home. I hit the truck and take off.

"It's a challenge to all of us when our public is inconvenienced by the loss of power. It's a responsibility we can't take lightly."

PRESENTS A CHALLENGE. Ernest Kelly, utility foreman, Denham Spring, believes that it's a challenge to all Gulf Staters when our public is inconvenienced and that it places a big responsibility on all of us.

HOW IT'S DONE. That's what Earl Outcalt of General Atomic, left, tells Joe Hines, Jr., middle, and Lee Etheridge, a teacher and student, respectively, from Cleveland

High School, about his role in controlled fusion research during the science conference. This was the sixth symposium to be co-sponsored by our Company.

. . . co-sponsored by our Company

University of Texas' Nuclear Symposium Draws State's Outstanding Students

ATOMS AND YOUTH spell energy and there was plenty of each on the campus of the University of Texas June 12-15.

The occasion was the sixth annual Texas Nuclear Science Symposium, a knowledge explosion which attracted the cream of Texas' high school science crop and their teachers. Over 500 were on hand for the four-day conference, which featured lectures by several of the nation's leading nuclear scientists, tours of research facilities and a lengthy exposure to the latest in atomic exploits, problems and challenges.

The symposium is staged jointly each year by the University of Texas and the Texas Atomic Energy Research Foundation—made up of Gulf States and nine other investor-owned electric utilities in Texas. Our Company paid all expenses for 39 students and teachers in attendance from our Beaumont, Port Arthur and Navasota divisions.

What do companies get in return for playing intellectual Santas each summer? Utility representatives who handle the symposium say a "shot in the arm" in public relations and a headstart on recruiting some of the top talent in the next generation of scientists and technicians. The immediate goal of the conferences, of course, is to stimulate students to pursue careers in science and engineering. But it's hardly incidental that the symposiums are also helping develop a reservoir of long-term good-will among the students and

their parents, friends, local schools and with the general public.

Our Company's delegation, composed of 22 students and 17 teachers, was carefully-screened and selected by school administrators on the basis of outstanding academic and scientific aptitude. The youngsters, most of whom had just received high school diplomas a week or two earlier, weren't expected to grasp the entire content of the symposium lectures. They were given an exposure to the drama of the atom, however, and if they found it interesting they had the opportunity to talk at length with an impressive roster of scientific figures. Many students found it that fascinating and the discussions often stole the show.

Participants heard such scientific notables as Dr. Charles Wharton of General Atomic talk on research in controlled thermonuclear reactions and Dr. E. C. Creutz, vice president of General Atomic, speak on research for the nuclear industry. Small group discussions were popular with the students because it gave them a chance to talk off-the-cuff with the scientists about career opportunities as well as actual research progress. Tours, always a favorite among both students and teachers, included stops at an atomic reactor, a computation center, a digital computer, an electron microscope and laboratories where ion cyclotron resonance heating, civil engineering testing, thermonuclear plasma compressions, plasma injection and electron diffraction—to mention a few—were under way.

SYMPOSIUM SITE. Students and teachers scurry to classes during the four-day symposium on the University of Texas campus. All 500 were quartered in air-conditioned Kinsolving Dormitory.

BRAIN SESSION. One of the most popular parts of the symposium program was the small, informal group discussion, which brought the participants together with the lecturers for off-the-cuff discussions.

TELLS OF OUR ASSISTANCE. Lloyd N. Brannan, supervisor of area development, talked on our Company's area development activities during the Navasota Economic Development Clinic June 23 at our division office auditorium. Purpose of the one-day clinic was to provide Navasota community leaders with the know-how in preparing for and attracting new industry.

Industrial Clinic Provides Development Know-How

THE MESSAGE WAS CLEAR, to the point and sobering.

provide know-how in preparing for and attracting new industry.

"Some 260 small towns will cease to exist between now and the year 2,000 simply because they don't fit into the dynamic growing pattern of Texas," said Harry Clark, executive director of the Texas Industrial Commission.

He was speaking to Navasota, Texas, business leaders during the June 23 Navasota Economic Development Clinic at our Company's division office auditorium. Navasota isn't interested in "phasing out" of existence. To the contrary, community leaders are setting a clearly-defined course toward progress.

The clinic, which drew over 70 participants, was one of the community-wide educational vehicles, according to Albert Miller, head of Navasota's Industrial Development Committee. Purpose of the clinic was to

"Industry goes somewhere for two reasons," Mr. Clark told the group. "First, a business goes where it can make a profit—whether the reason is labor, transportation or raw materials. Secondly, an industry chooses a certain place because of an intangible factor where personalities of the firm and the community dove tail. Something in the town must appeal to industry."

Our Company's Lloyd Brannan, supervisor of area development, was one of the clinic's nine speakers. He told the audience of services and assistance available from our Company in area development activities. Other speakers came from the Texas Industrial Commission, a telephone company, three railroads, a gas company and the economics research department at Texas A&M University.

Program participants got a first-hand look at the city and its industrial sites and buildings before the clinic began. The climax came at a community fish fry at Fireman's Hall that evening, when Mr. Clark delivered his best shots to Navasota residents in a hard-hitting talk on "The Citizens' Role In Industrial Development."

DOWN TO BUSINESS. Two of the 70 business leaders attending the Navasota Economic Development Clinic note some interesting plans for attracting new industry to their town. It was the 16th such clinic staged by the Texas Industrial Commission since inauguration of the program last fall.

J. Kirby Jones

J. O. Bauman

Kirby Jones, J. O. Bauman To Retire August 1

J. KIRBY JONES, superintendent of sales for Port Arthur Division, will retire August 1. He completed 40 years of service on July 5.

Mr. Jones began his career at Beaumont in the Production Department of one of our predecessor companies, Eastern Texas Electric Company, as an oiler at the old Tevis Street Power Plant in August, 1920. He progressed to fireman, engineer and system load dispatcher before quitting to return to school. He attended South Park Junior College from 1928 to 1930. He was graduated from Texas A&M College in 1933 with a bachelor of science degree in electrical engineering.

He then returned to the Company as an engineer in the T&D at Beaumont. He was promoted to power sales engineer in 1938.

In January, 1941, he left for service with the U. S. Army for five years. He served in the Southwest Pacific area for 2½ years. He was a major in Ordnance. He returned to the Company in October, 1945, as a power sales engineer at Beaumont. He was promoted to superintendent of sales

in November, 1947, and transferred to Port Arthur Division.

A native of Edgerly, Louisiana, Mr. Jones is married to the former Helen Pauline Moore of Gainesville, Texas. They have one daughter, Mrs. Madison B. Wright, Jr. of Lake Jackson, Texas, and one grandson, Madison, III.

Mr. Jones has long been active in area civic affairs. He is a past president of the Beaumont A&M Club. He has served on the board of directors of the Retail Merchants Association, the United Fund, Port Arthur Chamber of Commerce, and was on the board of deacons of the Westminster Presbyterian Church.

Mr. Jones is presently serving on the board of directors of the Port Arthur Club, is vice chairman of the board of directors and chairman of the new building, grounds and new equipment committee of Port Arthur College. He is a member of the Sabine Area Sales and Marketing Executives Club, having served as secretary in 1954, a member of the board of ruling elders of Westminster Presbyterian Church, a member of Port Arthur

Lions Club, having served as president in 1951 and a member of the CavOIL-Cade Commodores, having served as chief Commodore for 1962.

He is also a member of the Masons, American Legion and Port Arthur Country Club.

Mr. and Mrs. Jones will continue to make their home at 4625 Sunken Court in Port Arthur following his retirement.

J. O. BAUMAN, electric maintenance supervisor at Louisiana Station, Baton Rouge, will retire August 1. He has completed almost 50 years of service in the electrical utilities field.

Mr. Bauman began work on February 1, 1917. He joined our Company on January 8, 1927, at Beaumont after being employed by affiliated companies, Pensacola Electric Company and Alabama Power Company. He was transferred to Baton Rouge and Louisiana Station in 1943 as a master electrician. He was named electrician foreman in 1947 and has been electrical maintenance supervisor since 1959.

A native of St. Louis, Missouri, Mr. Bauman was reared and educated at Pensacola, Fla. He is married to the former Eva Blackmon of Eufaula, Alabama. They are members of the First Baptist Church in Baton Rouge.

The Baumans live at 3126 Monroe Ave., Baton Rouge, but plan to move to Florida following retirement and spend their time camping, fishing and traveling over the United States.

If a thousand men fail at a task and all of them agree that it cannot be done, their contention is negated by one person who succeeds at the task. The fact that he did it proves that it CAN be done. Millions may be held back and broken by handicaps, but if only one individual achieves success in spite of a handicap, this proves that handicaps need not and should not be a barrier.—Eric Butterworth in GOOD BUSINESS.

Watler, Strong Promoted To New Positions At Nelson Station

CEDRIC H. WATLER, formerly operation supervisor at Roy S. Nelson Station, has been promoted to maintenance supervisor and **W. Garland Strong, Sr.**, formerly operation and maintenance supervisor at Riverside Station, has been promoted to operation supervisor and transferred to Nelson Station.

Mr. Watler, a native of Grand Cayman, British West Indies, has been

Cedric Watler

with our Company since 1936 when he came to work as an oiler at the old Lakeside Station in Port Arthur. He progressed to station clerk by 1937 and was transferred to Neches Station in 1938 as an assistant fireman. He progressed through various production classifications at Neches Station until named station engineer in 1954. He was promoted to operation supervisor in 1958 and transferred to Roy S. Nelson Station in Lake Charles.

Mr. Watler is married to the former Anita Beatrice Dixon of Beaumont and they have four children, Mrs. Scot Jacobsen of Carlyss, Louisiana, Mrs. Glen Guillet of Beaumont, Betsy and Reggie, Lake Charles.

The Watlers are members of the first Presbyterian Church of Lake Charles where he is an elder. He is a past president and member of the Industrial Management Club of Lake Charles, a member of the Louisiana Engineering Society, a member of the Lake Charles Association of Commerce and a member and a director of the West Calcasieu Association of Commerce.

Mr. Strong, a native of Roscoe, Texas, joined our Company in 1928

Garland Strong

as an assistant fireman at Neches Station. He progressed through various positions to station engineer in 1949 and was transferred to Riverside Station in Lake Charles. He was

promoted to operation supervisor at Riverside in 1958 and was named operation and maintenance supervisor in 1962.

Mr. Strong is married to the former Margie Adams of Jasper, Texas, and they have four children, Walter, a 1966 LSU Law School graduate; Martha, a school teacher in Houston; Myra, a student at LSU; and Pat, a 1966 graduate of Sulphur High School.

The Strong's are members of the Maplewood Methodist Church where he is a charge lay leader. He is president of the West Calcasieu Association of Commerce and is a member of the West Calcasieu Kiwanis Club.

AGGIES VISIT OUR RESEARCH FACILITY. Our Company played host to nuclear engineering graduate students of Texas A&M at one of our three atomic research projects, SEFOR at Fayetteville, Arkansas, during June. From left are Dr. W. H. Kohler, assistant professor of nuclear engineering at Texas A&M, and Bill Brandon, industrial development counselor for Southwestern Electric Power Company. Our Company's H. E. Mortimer, assistant to the board chairman, is in the middle. Others are Texas A&M students.

THE WINNERS. Members of Beaumont's "Big Ten" bowling league line up with their trophies at the annual award dinner in the Royal Manor Restaurant.

TOP TEAM. The "Power Houses" bowled their way to top team honors during the past bowling season. Team members are, left to right, Willie Wilson, Flo Wenzell, Larry Wenzell, Betty McLean and Myrl Hollyfield.

"Top Ten" Bowlers Presented Awards

ALL BOWLERS WHO WERE the recipients of trophies in the Gulf States' "Big Ten" bowling league in Beaumont, climaxed the season's bowling, June 21, with an awards dinner at the Royal Manor Restaurant in Beaumont.

Flo Wenzell, vice president of the league, was called on at the last minute when the outgoing president, Bill Hollins, suffered a snake bite early that day and was unable to attend.

The program included the presentation of trophies and election of officers for the 1966-67 season, who are as follows:

President	E. C. Van Eman
Vice President	Muriel Hayes
Secretary-Treasurer	Myrl Hollyfield

League play will resume in September. Those interested should contact Myrl Hollyfield, Ext. 615.

INDIVIDUAL WINNERS. Individual award winners included, left to right: Nathan Knox, men's high series with handicap, 710; June Tompkins, women's high series with handicap, 646; Muriel Hayes, high average for women, 147; Flo Wenzell, high average for women, 147; Ken Londers, high average for men, 176. Not pictured was Bill Hollins, high game with handicap, 260.

NEW LIONS OFFICERS. John Bordelon, fourth from left, was recently elected third vice president of the Jennings Lions Club. Mr. Bordelon is a residential sales representative in Jennings. Other officers are Warren Comeaux, president, Bill Welborn, first vice president, Arthur Bonin, second vice president, Joe Hardin, treasurer, William Evans, secretary. (Photo courtesy of the Jennings Daily News.)

gulf staters in the news

John Bordelon, residential sales representative, Jennings, was named "Secretary-of-the-Year" for District 8-0 at the state Lions Convention at Baton Rouge last month. District 8-0 is comprised of clubs in Southwest Louisiana and 38 secretaries were in competition for the honor. Mr. Bordelon has also been elected third vice president of the Jennings Lions Club.

Eddie Belair, storekeeper, Jennings, has been elected a second year director of the Jennings Lions Club.

Baton Rouge Employees

Qualify for Prizes

In Fishing Rodeo

COMPANY FISHERMEN spent a busy week, May 27-June 5, trying to qualify for 311 prizes in the 11th Annual Fishing Rodeo at Baton Rouge.

The rodeo was held at Old River and False River and enough fish were caught to cover the 133 winning places. Prizes were awarded to rodeo winners on June 13 at Louisiana Station's assembly hall.

FISHING RODEO COMMITTEE. The committee for Baton Rouge's 11th Annual Fishing Rodeo go over the entries before the prizes were awarded on June 13. Committeemen were, left to right, Bobby Kirkpatrick, James Gremillion, Francis Amedee, Paul Bernard, John Hood, Jimmy Harvey and Don Blue. Mr. Blue was chairman of the fishing rodeo and Mr. Hood was secretary.

FIRST PLACE WINNER. Joe Mayeux, Baton Rouge Line Department, received a reel, rod, tackle box, ice box, camp stove and two boat cushions for this first place bass.

WINNING KIDS. Winners in the Junior Division show off their winnings. They are, first row, left to right, Dwain Bernard, Gene Smith and Jess Easley, second row, Billy Smith, Lois Easley, Kyle Kirkpatrick; third row, Dianne Henderson and Malcolm Kelly.

TOP WINNERS. First place winners in the fishing contest were Gene Smith, Mrs. Ann Kent, Mrs. Van Bush, Webb Umberger, Roger Aucoin, Bobby Kirkpatrick and Joe Mayeux.

ALL OF THIS? Sammie McKenzie, Louisiana Station, does a juggling act with the prizes he won for his fourth place bass. Prizes included an ice chest, rod, reel and two boat cushions.

C. A. Davis

C. A. Davis, Baton Rouge, Dies Following Long Illness

CARL ALLEN DAVIS, SR., 41, died at his residence in Denham Springs on July 4 following a long illness.

Mr. Davis joined our Company at Baton Rouge in 1948 and was a truck-driver in the Baton Rouge T&D when he went on a leave of absence because of illness in July, 1960. He was placed on total and permanent disability in September, 1960.

A native of Ponchatoula, Louisiana, he served in the U. S. Navy during World War II.

He is survived by his wife, Mrs. Verna Averett Davis of Route 1, Denham Springs; five sons, C. A. Jr., Larry Wayne, Kenneth Earl, Gerald Glen and David Charles, all of Denham Springs; two sisters and a brother.

Sympathy to:

R. M. Craig, division engineer, Nava-sota, on the death of his father, **R. E. Craig**, 93, of Hamilton, Texas, on July 11.

Warren W. Anderson, master repairman, Nelson Station, on the death of his father, **Arthur L. Anderson**, in Seneca, Missouri.

On Our Library Shelves

The following is a list of new books recently added to the Company Library in Beaumont. The library contains a large number of books and periodicals on a variety of subjects. These may be checked out for use by employees throughout the system. You are urged to make use of this facility.

Sons of the South by Clayton Rand. One hundred gallant men from the American South come to life with special emphasis on the Civil War. It is a stirring tribute to those who have added to the greatness of the nation and the glory of the South.

Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables by the National Bureau of Standards. Prepared to try to meet the needs of all table users, but will in many cases acquaint its users with new functions.

THE FIELD THAT A COMMUNITY BUILT. Crews from the Beaumont Line Department work on the lighting system at the new Beaumont Youth Baseball Association field on Smart Street. Estimated cost of the project is \$50,000, but donations of materials, tools, welding materials, a 30-ton crane and labor by professionals and members of the organization cut the cost by three-quarters. Gulf Staters volunteered to work on the electrical system on their own time as their part of this community effort. Colt League, Connie Mack League and Beaumont High School games will be played on the diamond, which was dedicated as Price Daniel Field, during the District Three Colt League Tournament on July 20. Former Texas Governor Daniel was present at the dedication ceremonies.

Congratulations 1966 Graduates

EACH YEAR THE SONS AND DAUGHTERS of Gulf Staters graduate from high school and college. PLAIN TALKS is honoring these graduates, along with an employee and an employee's wife, this month with their photographs and bio-

graphical sketches. Following the graduates' section are the photographs and information on Gulf States children who earned honors during the 1965-66 school year. To all of these students, PLAIN TALKS offers congratulations and best wishes.

PETE ABAD

Pete, son of Pedro Abad, janitor in the Navasota Division Headquarters, is a 1966 graduate of Navasota High School.

George, Jr., son of George Moore, Louisiana Station, was graduated from Progress Elementary School, Scotlandville, and was awarded certificate of appreciation by the Greater Baton Rouge Safety Council. He'll attend Scotlandville Junior High next year.

ANNA JILL OGDEN

Anna Jill, daughter of Mr. and Mrs. Jack Ogden of Colmesneil, he's a sales representative at Woodville, was salutatorian of the 27 member graduating class of Colmesneil Junior High School. She plays baritone in the "A" band and sings in the choral group. Jill is active in 4-H work, winning blue ribbons the last two years in dress revue and for record books.

JACK OGDEN, JR.

Jack, Jr., son of Mr. and Mrs. Ogden, will be a sophomore at Colmesneil High and is on the A and B honor roll. He plays baseball with the Pony League and is a member of the football squad. An active 4-H'er, he has participated in such projects as electricity, gardening, capons, beef cattle and broilers.

He is presently participating in the Brown Swiss dairy project. He caught his Brown Swiss calf in the Houston Calf Scramble and won a blue ribbon while showing her in the Fat Stock Show in March. He also won third place for his dairy records.

STEVEN OGDEN

Steven, son of Mr. and Mrs. Ogden, was an honor student at Colmesneil Elementary School. In his first year in 4-H work, he won a third place at the South Texas State Fair for his pen of broilers. He entered the District Soil Conservation Contest at Nacogdoches in April and placed third.

THOMAS ROGER OGDEN

Thomas Roger, son of Mr. and Mrs. Ogden, was named to the honor roll and won first place

in the District 32B spring spelling contest. Roger is also a member of the Cardinal Little League and an active 4-H Club member, taking Grand Champion prize for broilers at the South Texas State Fair.

LINDA PATE

Linda, daughter of Mr. and Mrs. David T. Pate, Jr., serviceman at Woodville, has been named head cheerleader at Kirby High School in Woodville where she will be a senior. She was a cheerleader in her junior year. She has been a class officer and a "Class Favorite." She is a member of the National Honor Society and lettered two years in basketball and was named an all-district guard and is president of her Sunday School class. She plans to attend Stephen F. Austin upon graduation.

(Continued on next page)

REBECCA ANNE PETERS

Rebecca Anne, daughter of Mr. and Mrs. R. J. Peters, System Engineering, Beaumont, was named to the A honor roll at James Bowie Junior High School where she was a seventh grade student. She was a member of the Bowie tumbling team and was on the staff of the Buffalo Roundup, the school newspaper.

CYNTHIA LUE SMITH

Cynthia Lue, daughter of Mr. and Mrs. Charles Ray Smith, meter reader at Calvert, received a certificate of award for being an honor roll student at Calvert Elementary School.

RITA WINGARD

Rita, twin daughter of Mr. and Mrs. Wingard, was head majorette for the Bridge City Junior High School Band and made a first rating in solo twirling and a third rating in competition at the CavOILCade Twirling Contest in Port Arthur. She is a member of National Junior Honor Society and historian for the student council.

EARL ROSS

Earl, son of Mr. and Mrs. Julius Ross, Beaumont T&D, received a certificate of merit in general math as the highest ranking student in the ninth grade at Hebert High School.

NITA WINGARD

Nita, twin daughter of Mr. and Mrs. O. C. "Buck" Wingard, commercial sales representative, Orange, was named copy editor for "The Red Raider," first annual for Bridge City Junior High School. She was historian for the National Junior Honor Society and librarian for the band. She was in a brass ensemble that received a first place rating in University Interscholastic League competition.

Port Arthur Picnic

SUMMER IS PICNIC TIME and that's what about 200 Port Arthur Division Gulf Staters did on Saturday, June 18.

The family outing took place at well-shaded Port Neches City Park and games, good food and plenty of visiting were the order of the day.

Working together to make the day a success were: Ray Pool, general chairman; Leonard Gaspard, entertainment; Don Ramsey, Don Boring, Doug Watkins, and Ray Kearney, committee members; F. T. Hargrove, food committee chairman, with J. L. Kelly as committee member; and J. C. Queen, safety man.

PEPA PHOTO CONTEST. Bill Richard, system industrial and commercial sales supervisor, presents Wallace Sisk, Advertising, with a first place award in the annual Petroleum Electric Power Association's Advertising Photographic Contest. The winning entry, a floodlighting shot of Cherokee Pipeline, Lake Charles, was judged the best dramatic black and white photo of a pipeline operation. Participants in the contest included all utilities in the south belonging to PEPA. Winning photographs will be used as source material for PEPA's 1966-67 advertising program.

Customers' Letters Continue To Reflect Good Public Relations

FROM CONROE:

(The following letter was received by W. E. Dinkins, district superintendent, Conroe, following the Nuclear Symposium sponsored by our Company, the Texas utilities companies and the Texas Atomic Energy Research Foundation at the University of Texas, June 12-15.)

Dear Dink:

You and your company are to be commended very highly for your participation in the Texas Atomic Energy Research Foundation. We want to thank you and your company for choosing James Young of our town to attend the Symposium at Austin. We know that you had a hand in choosing this fine young man.

We really appreciate having firms doing business in our area which are

interested in promoting the young people in our community.

Yours sincerely,
Richard E. Hill
Vice President
First National
Bank in Conroe

FROM BEAUMONT:

Dear Mr. Reagan:

I would like to thank you and Gulf States Utilities Company for giving me the opportunity of attending the Texas Nuclear Science Symposium at the University of Texas. I would especially like to thank you because you went out of your way to see that my stay and that of the others whom Gulf States sponsored was a memorable one.

I learned a lot at the symposium and I am just beginning to give all my notes a thorough going over. The opportunity of meeting so many

people of extraordinary intelligence, all concentrating on the same topic, was a stimulating experience for me.

Sincerely yours,
J. G. Brown
Kelly High School
Beaumont, Texas

FROM NAVASOTA:

This letter was received by A. W. Baird, division manager, Navasota, following our Company's sponsorship of the one-day Economic Development Clinic for Navasota business people.

Dear Albert:

We are again indebted to you and your company for allowing us the use of your personnel and equipment for our Navasota Economic Development Clinic.

Gulf States Utilities Company deserves full credit for the success of the Clinic. Without this equipment and help we could not have accomplished this success.

With our sincere thanks and best wishes, we are

Sincerely,
Wm. Albert Miller, President
Grimes County
Chamber of Commerce

FROM BATON ROUGE:

The following letter was received by Earl Broussard, commercial sales representative, Lafayette, in appreciation of his help at the recent 4-H encampment. This type of civic work is just one example of how Gulf Staters make themselves an important part of the communities in which they live and work.

Dear Earl:

Our agents are most grateful to you for the many many ways in which you have helped us. Your help with electric demonstrations at club meetings, electric workshops and clinics and your ideas and suggestions have contributed much to the improvement of our 4-H program.

Our recent 4-H encampment was a real fine success in the minds of all those who attended. I thought your efforts with your class contributed much to the success of the education

program, because it was so well planned, very informative, and very interesting. Your efforts in looking after the P.A. system, our electrical needs, the movies you showed, and your help with swimming, athletics and the night program contributed immensely to the success of the camp program.

Also, we are most grateful to you and your company for making it possible to recognize the Outstanding Boys and Girls and the Jr. Counselors at camp. Please express our appreciation to those who helped to make the very fine awards possible.

The "Red Apple" our agents presented to you represented their affection for you and their appreciation for your help. It is nice to work with people like you who are dedicated and devoted to their work and love boys and girls.

I hope you will come to see us whenever you are in Baton Rouge or on the LSU campus, and I hope we have an opportunity to camp together again.

Sincerely,
C. J. Naquin
District Program Specialist (4-H)

FROM ORANGE:

Dear Sir:

A few hours ago I experienced an emergency related to my electric range. In response to my call to Gulf States, a Mr. Sparks was sent out to correct the difficulty.

I wish to offer my commendation for the prompt, efficient, and most courteous service this man performed.

As a stockholder in Gulf States, I am pleased to observe the rendition of such fine service.

Yours sincerely,
Sylvia K. Miller
(Mrs. E. K. Miller)

Dear Mrs. Miller

Thank you for taking time to write your letter of June 18, and for the thoughts you expressed concerning our service.

As an electric utility company, we feel that our service does not end with the delivery of electricity to a cus-

tommer. As a stockholder, you know that service at reasonable rates is not easy in this era of inflated costs of almost everything, but this is our goal. It is encouraging to get letters such as yours.

I am passing your comments along to Mr. Sparks' supervisor in Orange. All of us appreciate your interest and hope we can continue to merit your confidence.

Very truly yours,
T. O. Charlton,
Superintendent,
Orange District

FROM NEDERLAND:

Good public relations is everybody's responsibility at Gulf States. It was proved again last month when two of our Port Arthur Division employees stopped along a busy highway to lend assistance to a mother and her small baby who had run out of gas. Mrs. Freddy R. Rogers was so impressed that she took time to write the following letter. The "Calvin" and "Jack" she mentions are Calvin Jaetzold, residential sales representative, Mid-County District, and Jack Goff, serviceman, Port Arthur. The few minutes they took to render aid probably won a lifelong friend for our Company.

Gentlemen:

This afternoon I was driving from Port Arthur to Nederland and ran out of gas on a deserted part of the highway. My four-month old daughter was in the car with me, but you would be surprised how many people just went zooming by.

However, two of your employees (driving one of your cars) turned around to help me. I am sorry to say I did not get their names but one was a young man with your Nederland office and the other works out of your Port Arthur and Beaumont offices. Their first names were Calvin and Jack, I believe. These men took my daughter and me to a station and stayed to see that I got help.

I would just like to express to you my appreciation of these fine employees of yours, as I'm sure you

realize how frightening it can be for a woman stranded on the highway alone.

Thanking you again, I am

Very truly yours,
Mrs. Freddy R. Rogers

FROM BATON ROUGE:

Dear Mr. Shaw:

It is indeed a pleasure, in behalf of the Louisiana FFA members, teachers of Vocational Agriculture and State staff members, to express our appreciation to you for participating on the annual awards program of the Second Farm Electrification-Mechanics Awards Luncheon held during the Thirty-Seventh Annual FFA Convention.

It was indeed a pleasure to have you make the presentation of the certificates and area winners' plaques sponsored by the Louisiana Investor-Owned Utility Companies. We appreciate the fine support given to us by Southwestern Electric Power Company, Louisiana Power and Light Company, Central Louisiana Electric Company, and Gulf States Utilities Company. We sincerely hope we can continue to merit such fine consideration as you people have shown us for the past several years.

Again we thank you.

Sincerely,
John D. Vallot
Supervisor-Executive Secretary

FROM HOUSTON:

Dear Mr. Dinkins:

Just a little belated note to say "thank you" for helping us with our power problem at Flamingo Lakes. Mrs. Woodward and I spent Fourth of July weekend at the cabin and everything was just perfect. We appreciate your kindness.

Very truly yours,
W. J. Woodward
President
Reagan State Bank

Fun Day At Beaumont's Live Wires Picnic

BEAUMONT EMPLOYEES and their families enjoyed another beautiful summer day at the annual Live Wires picnic at the club grounds near Silsbee.

Some 200 families were on hand to eat barbecued chicken prepared by the club's outdoor chefs. General chairman for this year's event was Gerald Dean.

Added attraction for the kids this year was a bosun-chair ride rigged up between two tall pine trees. The steady stream of youngsters left a couple of engineers, John Warmack and H. Lee Hammack, worn out by the end of the day.

The annual fishing rodeo saw the lakeshore lined with children and poles. The largest fish was caught by Andy Faggard, son of A. C. "Bobo" Faggard while the most fish were turned in by Raymond Welch, Jr., son of Ray Welch. There were also prizes for the girls, but none were able to hook any fish.

COFFEE CUP

BERNICE EAVES went to Bakers field, California, with her sister and brother-in-law, the George Kennedy's. They came back by way of the Grand Canyon, the Painted Desert and the Petrified Forest.

Other vacationers included Glenda Sims and Jessie Dyer.

Sally Dowden went to Waco and enroute took in Six Flags. The next

weekend, she attended the horse show in Houston.

—By Glenda Hinkle

JENNINGS

JENNINGS DISTRICT employees have been enjoying vacations recently.

Amos L. Fontenot, meter reader, spent a week vacationing at home, painting his home and also playing golf.

Mrs. Sylvia Guillotte, clerk, spent a week's vacation moving into her recently completed Gold Medallion home. Although it was a lot of hard work, Sylvia said it was well worth while.

Hutt Reed, commercial sales representative, spent a week relaxing by visiting friends and his parents at Lafayette. Our sympathy also goes to Hutt on the loss of one of his finest quarter horses, "Glow Royal".

Martin Wagnon, residential sales representative, enjoyed cleaning his beautiful yard and also got in some golf playing.

—By Mary Gauthier

CAMPING OUT. Getting ready to unpack a knapsack are Jackie Perrin, Belinda Benoit, daughter of Mr. and Mrs. Rodney Benoit, he's a meter reader in Jennings, and Deborah Bordelon, daughter of Mr. and Mrs. John R. Bordelon, he's a residential sales representative in Jennings. The girls participated in the week-long Girl Scouts camporee, June 27 to July 1. (Photo courtesy of the Jennings Daily News.)

BIG CATCH. Lionel B. Humphries, meter reader, Baton Rouge, caught this seven pounder in a lake near Gloster, Mississippi.

THE LAKE CHARLES Substation Department has a new reporter, Dorothy L. Cooley, who began work on June 6. Dorothy is from Ragley, Louisiana, where she finished high school in 1965. After completing high school, she attended McNeese State College for one year before coming to work in the Substation Department.

Another new employee in the Substation Department is Frank Golithly. He began work on June 1 and is a graduate of Iowa High School. Before coming to work in the Substation Department, Frank was employed by Ashy Construction Company.

—By Dorothy L. Cooley

MMARGARET ATRELLE, daughter of Mr. and Mrs. Joe Billy Corbello of Lake Chares, was graduated from Lake Charles High School. Mr. Corbello was employed in the T&D in Lake Charles from 1947 to 1954.

Atrelle plans to attend McNeese State College in the fall and will major in physical education.

NAVASOTA

Herbert Goebel, brother of Billy Goebel, departmental clerk in the Navasota Engineering Department, was awarded the \$600 Samuel Dale Marett, Jr., Scholarship Award upon his graduation from Navasota High School. He is a summer employee in Navasota.

Weddings

Roy L. Anderson, substation operator, Beaumont, was wed to Linda King in Charleston, S. C., on May 28.

Philip M. Carlin, helper, Port Arthur T&D-Line, and Miss Barbara Brasseaux of Groves, were wed May 28 in the Immaculate Conception Church in Groves. They are now making their home at 3630 14th Street, Port Arthur.

Carolyn M. Pansano, clerk, Port Arthur Accounting, was wed to Tommy L. Romero on June 4.

Grant T. Sutton, shop and field tester, Beaumont Meter, and Michele Watkins were wed on June 4.

HAVE A CIGAR ON-

Mrs. Tyrelle Hill, Lake Charles Safety-Claims, adopted a son, Paul D. Paul was born May 9. Mrs. Hill resigned from our Company on June 3.

Mr. and Mrs. William L. Dupuy, operator's helper, Louisiana Station, a son, Russell Paul, June 8.

Mr. and Mrs. Charlie A. Hart, apprentice, T&D-Line, Port Arthur, a son, Brett Joseph, May 29.

Mr. and Mrs. Fedrick Green, an employee at Nelson Station, a son, Craig, June 12.

Mr. and Mrs. Edwin H. Wheeler, Jr., senior draftsman, Beaumont, a daughter, Celeste Ann, June 13. Mrs. Wheeler is a former employee in System Advertising and System Engineering.

Mr. and Mrs. Basil C. Haley, serviceman first class, Lake Charles, a daughter, Vivian Dianne, June 1.

Mr. and Mrs. Carol Foreman, appli-

ance repairman, first class, Lake Charles, a daughter, Mary Esther, June 6.

Mr. and Mrs. Clyde W. Nugent, lineman fourth class, Orange, a daughter, Karen Jane, June 18.

ON WHEELS. Gail Sanches, Service Application, Baton Rouge, and Janet Holland, cashier, Baton Rouge, are out to beat the high cost of transportation with their new Hondas which they occasionally ride to work.

SALES OUTING. The Baton Rouge residential sales representatives and their families take time out during the sales outing to pose for camera. The outing, which included archery, swimming and bingo, was highlighted by the election of Miss Harriet Babin, left, as "Sales Queen of the Day." The affair, featuring a barbecued chicken supper, was held at Silliman College in Clinton. Pictured above are: left to right, bottom row, Gerri Glover, Georgie Simon, Fredda Hobgood and V. J. Braud; middle row, Sarah Goff, Jan Brady, Mildred Tribble, Pinkie Andrews, Thadlie Brady, Peggy McMurray and Tommy Allen; back row, Aubrey Glover, Julius Courtney, Larry Welborn, Louise Courtney, Anne Shaw, Odessa Braud, Jessie Braud and Bill Hobgood.

Is your car vacation-ready?

A TRACK MAN conditions himself carefully before tackling a cross-country course. Similarly, your car needs special conditioning for hot, fast cross-country travel, particularly if its usual exercise consists mostly of running errands at slow city speeds.

Your family is probably among the nine out of ten looking forward to a vacation by car this year. So during the month before your trip, plan to give your car the attention it needs to withstand the rigors of highway driving. Follow this checklist to insure a safe and carefree trip:

☐ Do your tires show any bruises or abrasions?

Misshapen tire surfaces indicate internal blisters or ply separations which can cause a blowout in hot highway driving.

☐ Do the tires have any cuts, missing chunks of tread, imbedded nails or glass?

Probe each laceration with a screwdriver or special probing tool to see how deep it is. Any cut that penetrates to the first layer of fabric is serious enough to condemn a tire.

☐ How about the spare?

Any suspicious tire should be removed from its wheel and put on the tire spreader for a close inspection of its inner surface.

☐ Do your tires need additional pressure?

The rigors of highway driving—plus a weighty load of passengers, luggage or trailer—will make your tires squeal for more air, probably four or more pounds of pressure than they need for city driving. Consult your owner's manual or ask your car dealer.

☐ Does your owner's manual indicate it's time for a front wheel bearing checkup?

Choose a trusty mechanic for this ticklish job. It takes an experienced man who will protect the bearings from dirt as he removes, cleans, lubricates and reinstalls them.

☐ Do your brakes need relining?

This check should be made at the time the front wheel bearings are repacked. A good mechanic can tell at a glance whether the brake linings need to be replaced. Front linings usually wear out before those on the rear wheels. But if the front brakes are badly worn, be sure to have the rear brakes inspected as well.

☐ Are your springs, shock absorbers or exhaust system defective?

These parts are closely connected with your driving safety—don't overlook them.

☐ Have you thought about your brake hydraulic system?

If your car is three or four years old, and especially if there has been fluid leakage at the master cylinder or any wheel cylinder, you should order a complete overhaul of the system.

☐ Has your steering system been checked lately?

The standard procedure includes a complete safety inspection for loose or worn parts and realignment of the entire system. Proper alignment is imperative for ease and safety in steering and also saves tires from excessive wear.

☐ Are all the lights okay?

There may be as many as 40 light bulbs in your car, probably more than you have in your house. But with someone helping, you can check them all in two or three minutes.

☐ Are your headlights okay for night driving?

Remember that after the whole family and all their luggage is loaded into the car, the rear-end spring depression may allow the headlights to shoot too high into the air. To avoid blinding oncoming motorists, redistribute the load, perhaps by using a top carrier for luggage.

☐ Are the belts and hoses in good shape?

Ask your serviceman to double-check these important (but inexpensive) parts to make sure they are sound enough for a hot highway trip.

☐ Is the air filter's time about up? Consult your owner's manual. If the air filter is nearing the end of its life, replace it now—you'll save gas on the vacation trip.

☐ How about the radiator?

Your car's cooling system will be getting a hard workout. Be sure the radiator is clean and properly filled.

☐ Did you check the windshield washer and wipers?

Fill the washer reservoir, then try the washer to make sure nozzles aren't plugged. If wipers don't clean the glass without streaks, replace the blades.

☐ Is the horn loud and clear?

Horns sometimes get out of adjustment, but it's not difficult to re-voice most models. The horn ring is adjustable too, and it's in need of attention if it doesn't make positive easy, even contact all around.

☐ Finally, what about the seat belts? Check to see that they're all in good condition, properly attached and adjusted. Then make sure all occupants wear their belts—every traveling minute.
